Guidance Notes for the Completion of this Application

1. Where the applicant's modification is seeking CAA approval of an FAA, EASA or Transport Canada approved STC, the Section 3 should state the STC number and the title of the STC.
2. Where the applicant's modification is seeking CAA approval of an FAA, EASA or Transport Canada approved STC, a copy of the STC should accompany this application form.
3. Regarding Box 3 and the Approval Reference/Basis of Approval. This field should detail the basis for the modification. For example, the basis could be an FAA, TCCA or EASA STC, an FAA minor or major alteration, an EASA DOA minor modification etc. Where the applicant's modification is seeking CAA Approval of an ANAC Approved Design Change, evidence must be provided that demonstrates what approval basis is being utilised to show compliance with CAR 21 Subpart C. For example, for a Major Design Change satisfactory evidence the ANAC STC has been certified, approved, validated or accepted by either EASA, FAA or TCCA through an internationally recognised bilateral agreement (and associated TIP) between that state and Brazil. The FAA, EASA or TCCA document that "validated" the ANAC STC must be quoted in Section 3 together with the ANAC STC number.
